Introduction:

This lab focuses on internet research on topic: Cybersecurity Awareness for University students. In this lab, we develop skills for using search techniques, evaluating online sources, organizing research information, and using academic platforms.

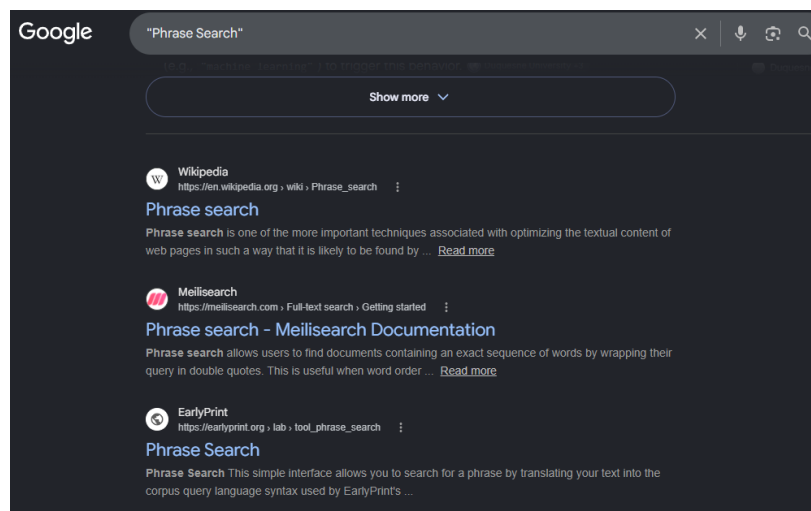

Exercise Tasks:

Perform one basic web search using suitable keywords:

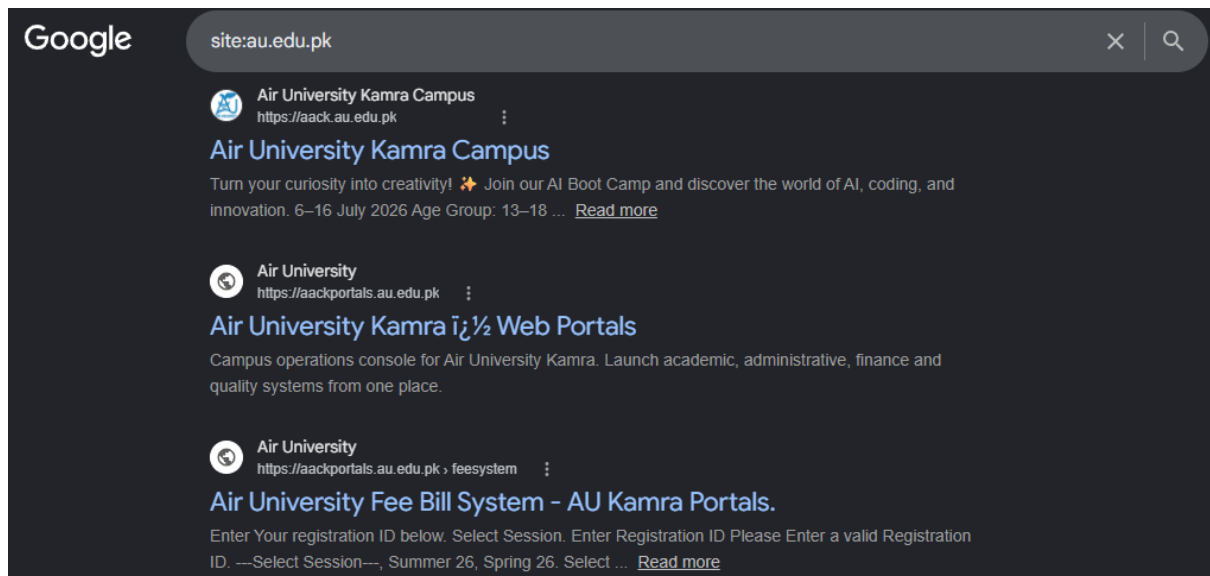

Using any search engine we can perform any type of web search.

Perform an exact-phrase search using quotation marks:

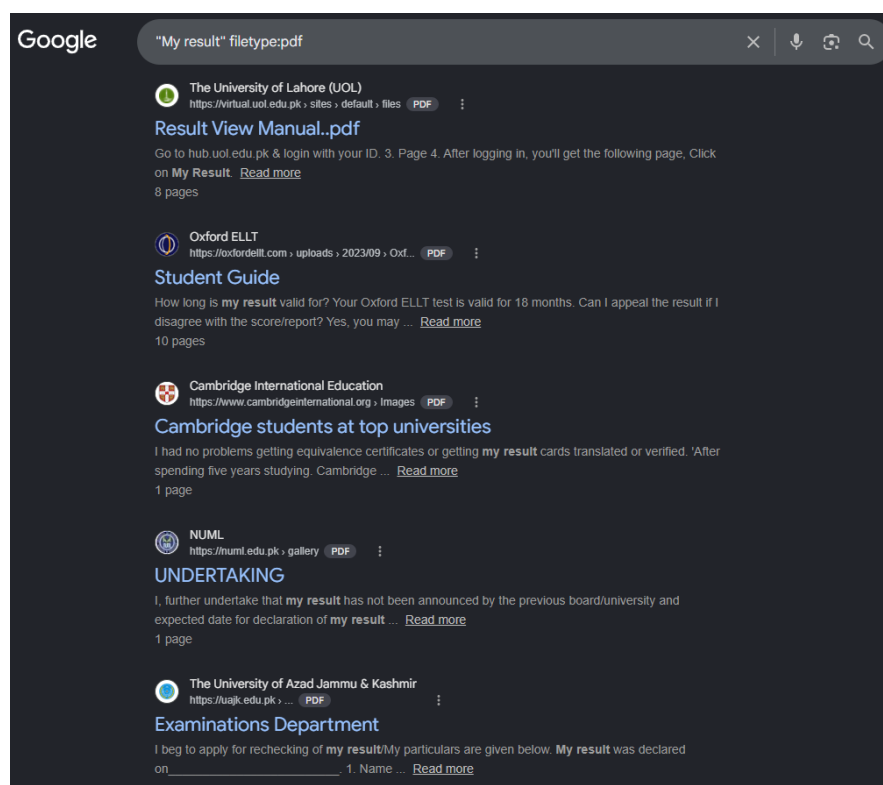

Using double-quotation on a string, we can get the exact variable around the internet.

Use the site: operator to restrict results to an educational or government domain.:

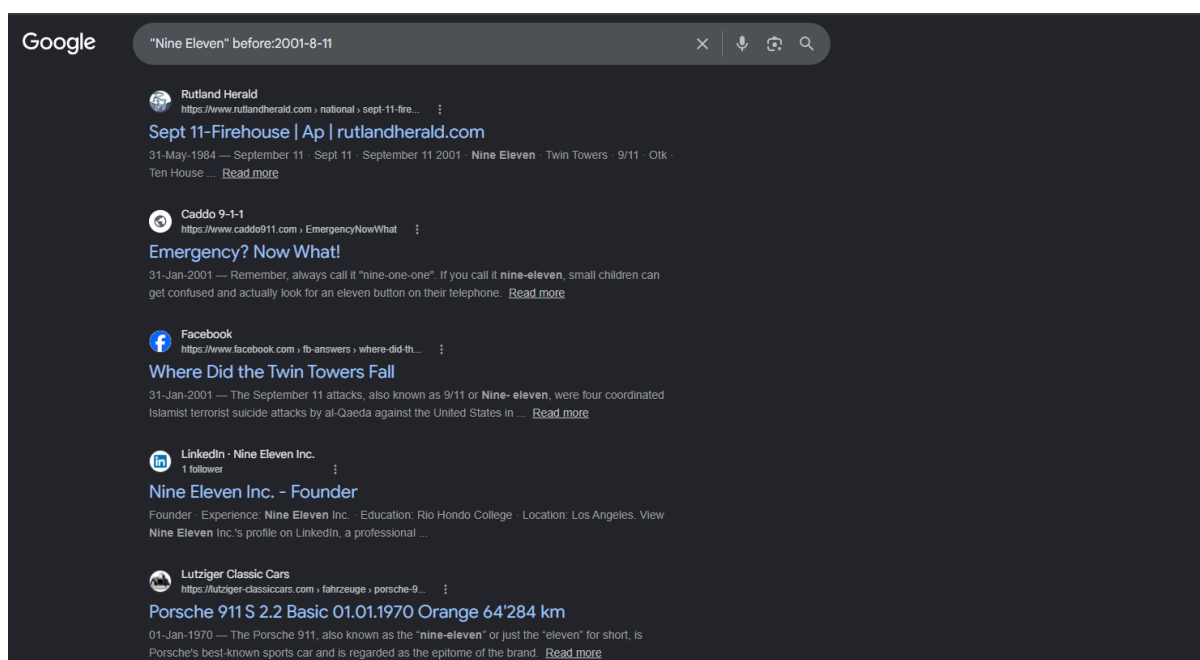

Using site: operator will get all the sites input in the search.

Use the filetype: operator to locate at least one PDF document:

If we add a specific filetype in filetype: operator, it will get only that type of file from the internet.

Use at least one additional search technique: exclusion (-), OR, before, or after:

As before: operator will result in displaying the pages uploaded on internet before the date mentioned.

Similarly, after: operator will result in displaying pages uploaded after the mentioned date.

And, OR operator between two variables will show either of variables present in pages shown.

Exclusion (-) operator will remove the desired item form the result.

Evaluate the Credibility of an Online Source:

Let's take three online source and evaluate its credibility.

1. Air university site: au.edu.pk (This is not an advertisement!)

Aurthur	Evidence	Currency	Relevance	Purpose	Use
Admins of AU.	# WHOIS .PK Domains (PKNIC) Domain: au.edu.pk Status: Domain is Registered Whois lookup suggest AU site domain is registered.	Creation Date: 2002-06-06 Expiry Date: 2028-06-06 Site was registered on 6th June, 2002.	Offering cybersecurity students relevant study programs.	Online presence, connectivity.	Connecting with students and professors.

2. “Building a Cybersecurity and Privacy Learning Program” Article by NIST:

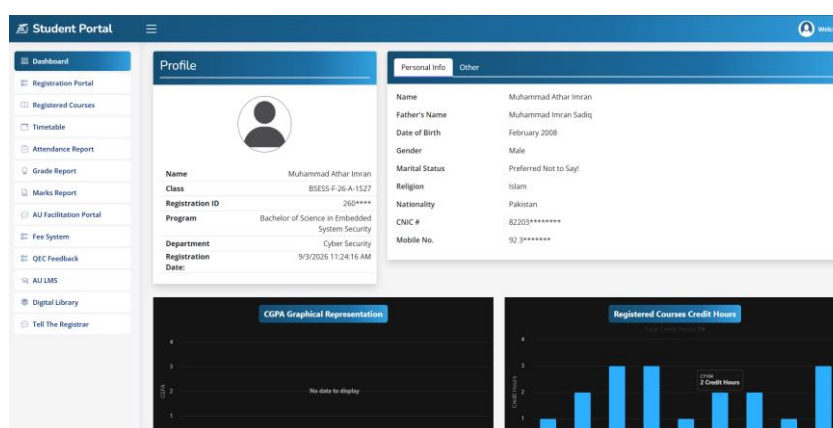

<https://www.nist.gov/publications/building-cybersecurity-and-privacy-learning-program>

Aurthur	Evidence	Currency	Relevance	Purpose	Use
NIST, and multiple authors.	 Site registered. is	Registered On: 1997-10-02 Expires On: 2027-08-24 Updated On: 2026-08-14 Site was registered on 2nd October, 1997.	Source discusses cybersecurity and privacy learning and awareness.	To provide guidance for developing cybersecurity and privacy learning programs	To build cybersecurity programs.

3. “CS181_Lab_01” brief.

Aurthur	Evidence	Currency	Relevance	Purpose	Use
This document is created by AU Lab Instructor Kainat Fatima	 File origin suggest it is developed by AU faculty.	Content created 24/12/2013 4:15 am Date last saved 08/09/2026 11:27 pm This file was created on 24th December, 2013.	Cybersecurity students get the awareness of efficient online search.	Document guides student to complete assignment	To create assignment on cybersecurity topic.

Open the AU Web Portal and identify the academic dashboard or available academic information:

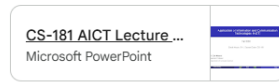

The screenshot displays the AU Student Portal interface. On the left is a sidebar menu with options like Dashboard, Registration Portal, Registered Courses, Timetable, Attendance Report, Grade Report, Marks Report, AU Facilitation Portal, Fee System, QEC Feedback, AU LMS, Digital Library, and Tell The Registrar. The main content area is divided into sections: Profile (showing Name: Muhammad Athar Imran, Class: BSESS-F-26-A-1527, Registration ID: 260****, Program: Bachelor of Science in Embedded System Security, Department: Cyber Security, Registration Date: 9/3/2026 11:24:16 AM), Personal Info (showing Name, Father's Name, Date of Birth, Gender, Marital Status, Religion, Nationality, CNIC #, and Mobile No.), and Academic Information (CGPA Graphical Representation and Registered Courses Credit Hours).

Open the assigned CS181 Google Classroom and locate the Week 01 lab material or submission area.

Week 01 lab material and submission area is not uploaded yet, so only uploading screenshot of CS181.

Observation Sheet

Item	Observation
Basic Search Query	Search the relevant content from internet.
Exact-Phrase Query	Get the exact phrase from internet.
Domain-Restricted Query	Only display the desired site information.
PDF Search Query	Results in showing pdfs from internet.
Combined Query	Results show both of input contained sources.
Most Credible Source	Obtained by evaluating criteria.
Publisher / Author	Can be obtained by various sources.
Publication / Update Date	Using whois lookup or folder properties.
Research Folder Name	Created.
Google Classroom Accessed (Yes/No)	Yes.
AU Web Portal Accessed (Yes/No)	Yes.
Zoom Screen Share Completed (Yes/No)	Not shared yet, but yes.
